

## About us

Precision Aerial Group is a commercial technology consultancy, services and training group of companies that provides solutions in Drone Technology, Robotics and Artificial Intelligence. Based in Zimbabwe and operating in Southern and East Africa, we provide leading technology solutions for several industries including Agriculture, Construction, Energy, Healthcare, Insurance, Mining and Utilities.

Within the group is ZIMBABWE FLYING LABS, which was founded in 2020 and is part of the global FLYING LABS NETWORK, an international network of local technology and innovation hubs that leverage drones and robotics for social and humanitarian impact. FLYING LABS has a global footprint with hubs in over 33+ countries across Africa, Asia, Europe, and Latin America.

ZIMBABWE FLYING LABS provides drone and robotics solutions using emerging technologies to solve local challenges. The mission is to grow the positive impact of the use of technology in a number of fields including Development Planning, Disaster Risk Reduction & Management, Environmental Management, Conservation, Agriculture, Youth Training, Education and Public Health.

Recently, we launched the first Drones in STEM education program designed to transform education and give young learners practical skills and a deep understanding of technology. Zimbabwe Flying Labs works with a number of local and global partners to accelerate their work in communities around the country.
